

Drilling guide accessory for precise spacing of sap flow sensor needles in trees.

East 30 Sensors

Sensors for biophysical research.

DRILLING GUIDE

- Required for precise drilling of holes in sample material. Used in conjunction with sap flow sensors only.
- Drill bit shank must pass through drilling guide and into the tree.

Material: steel

Drill bit size: #55

Drill bits are available from Thermal Logic or Rutland tool company.

Spacing: 35mm

Dimensions: 4.0 x 0.5 x 0.5 inches
